Re: FCC NPRM 05-311

I add my voice to others in opposition to any local or national legislation that would harm or end Public, Educational and Governmental (PEG) Access TV.

I tune in programming provided on Sierra Nevada Community Access Television (SNCAT) in Reno, Nevada. Of most interest to me are the airings of the meetings held by members of elected entities and appointed boards, etc. Being able to see what our government is up to is becoming more important every day. I want to see those meetings. I also enjoy the variety and "free-form" of many of the programs.

It has been my privilege to be associated with a local Reno production, "With Liberty and Justice for All". This program covers issues that include but are by no means limited to constitutional, government, national security, civil rights, and providing information regarding access to alternative medicine and health. Such programs are run on very tight budgets and contributions of any kind are welcome. A community grows within these programs. I am honored to have hosted for their stays in Reno Mary E. Webster ("The Federalist Papers in Modern Language Indexed for Today's Political Issues"), Dr. Jennifer Daniels (alternative medicine), and Doc Mike (alternative medicine). What an opportunity meeting these dynamic people. That the programming being provided is informative and important makes me a willing volunteer.

My above comments are for the record and are in opposition to any legislation that would harm or end my access to PEG!

Thank you very much.
